

All hotels CITOTEL were created in POI and are thus directly viewable and accessible via your GPS. Wherever you are, you can easily access your CITOTEL. To do this, download the file CITOTEL in the format of your GPS.

The process of integration and the file format of POI \* different depending on the type of GPS (Tomtom, Navman, etc..). Below the main GPS with recommendations to integrate POI \*.

*\* POI: Point of Interest is useful information as files to download and display on a GPS (restaurants, hotels, List of radars, etc..).*

### **Tomtom ©**

Download the file to integrate the two files citotel.ov2 and citotel.bmp in your Tomtom. For help, see the [integration guide](#).
